UNDER THE GUIDANCE OF
Mr.A.M.Dyade

in partial fulfilment for the award of the degree
of
BACHELOR OF TECHNOLOGY
IN
DEPARTMENT OF COMPUTER SCIENCE AND
ENGINEERING
at

SHRI VITHAL EDUCATION AND RESEARCH INSTITUTESs,
College of Engineering, Pandharpur
Affiliated to Punyashlok Ahilyadevi Holkar Solapur University, Solapur
2023-2024

SVERI's COLLEGE OF ENGINEERING , PANDHARPUR

CERTIFICATE

This is to certify that the project report entitled "Fake Currency Detector" is submitted for partial fulfillment of Bachelor Degree in Computer Science And Engineering as per requirement of Punyashlok Ahilyadevi Holkar Solapur University, Solapur for the academic year 2023-2024.

PRINCIPAL

EXTERNAL EXAMINAR

Acknowledgement

We are pleased to acknowledge **Dr.S.P.PAWAR** (HOD CSE) for her valuable guidance during the course of this project work . We extend our sincere thanks to **Dr.P.D.MANE** who continously helped us throughout the project and without his guidance , this project would have been an uphill task

We are also grateful to other members of the CSE faculty members and technical staff who cooperated with us regarding some issues

Last but not the least , Ms.T.A.Dhumal supervisor of Project Lab and Mr.P.D.Mane supervisor of Database Lab as the case may be for project sessions , also cooperated with us nicely for the smooth development of thid project . I would also like to thank my parents and friends who helped me a lot in executing this project within the limited time frame .

CONCLUSION AND FUTURE SCOPE

CONCLUSION :

The e-commerce application for home service greatly enhances convenience for consumers by providing a user-friendly platform to browse and order various home services. It offers a seamless experience, allowing users to book services at their convenience, reducing the need for time-consuming phone calls and manual coordination.

The application offers a wide range of services, from house cleaning and plumbing to gardening and electrician services, providing users with a one-stop solution for their home service needs. This diversification of services increases the application's utility for customers.

FUTURE SCOPE :

The following improvements can be made to the system ,

- Internet of Things (IoT) devices in homes will become more common, and e-commerce home service applications can integrate with these devices. For example, smart home systems could automatically request services like HVAC maintenance when needed, creating a more proactive approach to home maintenance.
- The range of services available through these applications is likely to expand. This could include more specialized services, such as home automation, renewable energy installations, and eco-friendly home improvement services.
- Building and maintaining trust between users and service providers will be an ongoing focus. Improved background checks, user reviews, and transparent ratings systems will be implemented to foster trust.
